

The logo for Cleanfarms 15 Years. It features the word "cleanfarms" in a green, lowercase, sans-serif font. Above the letter "a" is a yellow semi-circle representing a sun. To the right of "cleanfarms" is the number "15" in a large, bold, green font, with the word "YEARS" in a smaller, green, uppercase font directly below it.

cleanfarms 15 YEARS

What's Next for Agricultural Plastics in Manitoba?
Cleanfarms

Producer Responsibility Organization

- Focus: Agricultural Plastics
- Not for profit business model

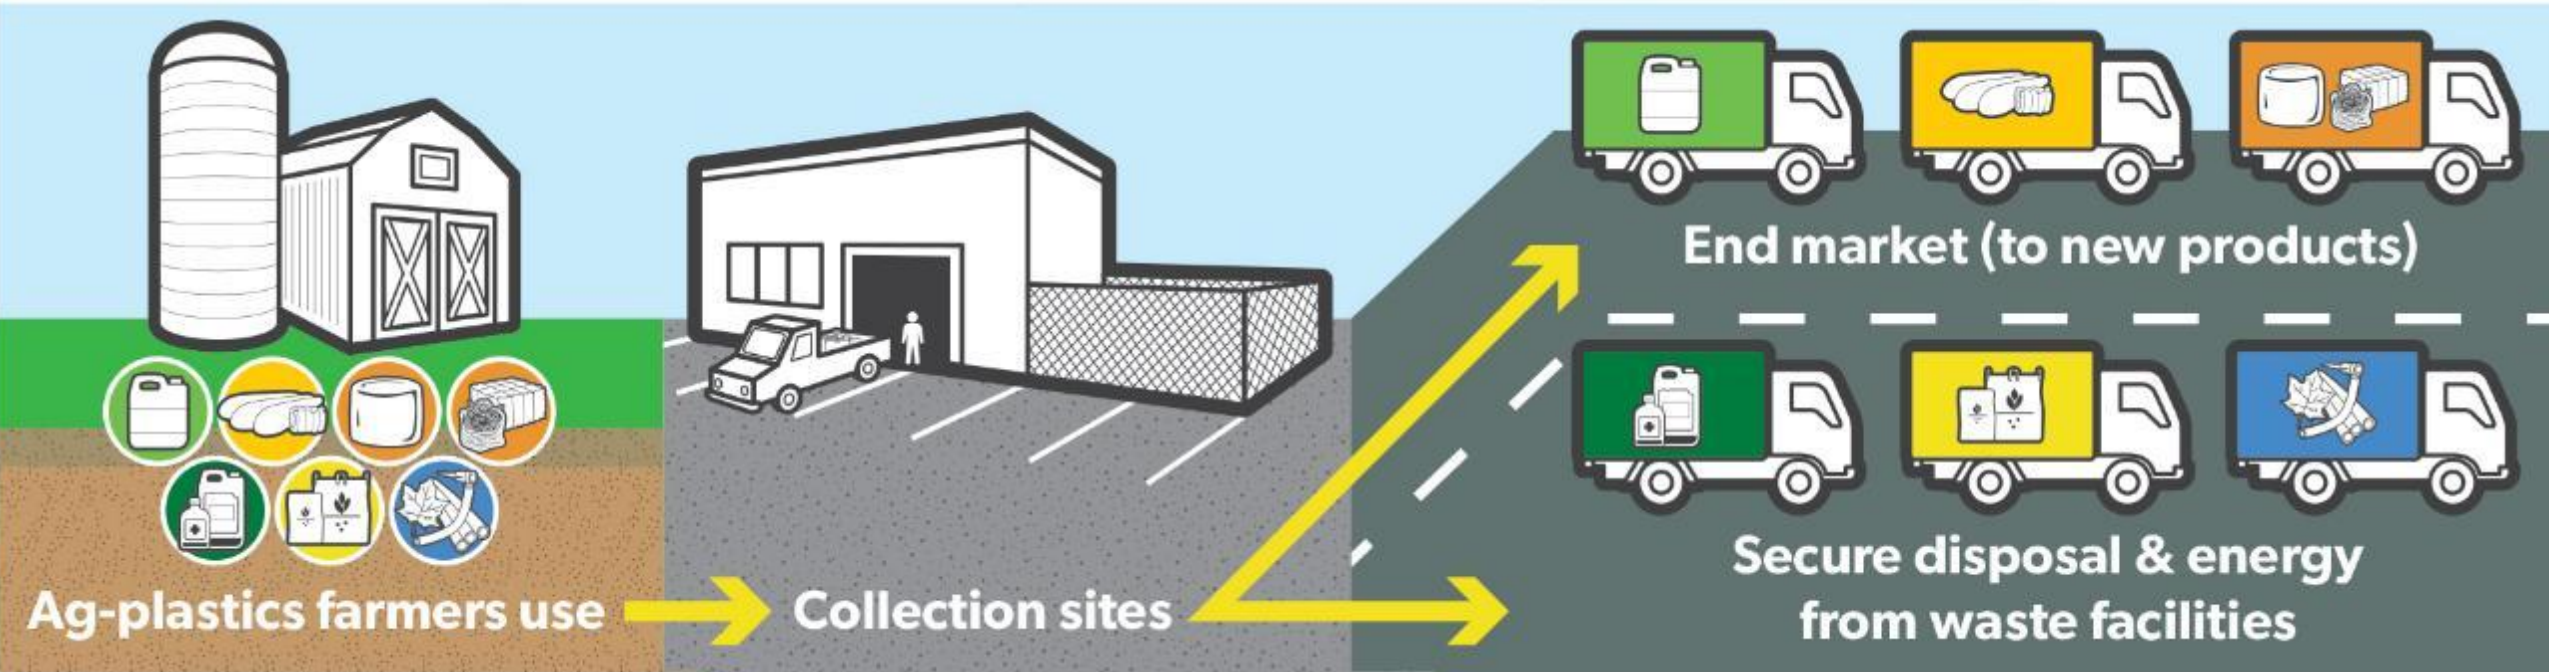

~200 members

- Pesticide, fertilizer, seed, animal health medication, peat, animal bedding, feed, ag plastics, maple syrup tubing industries

Sample of Cleanfarms' members

All provinces, over 10M km²

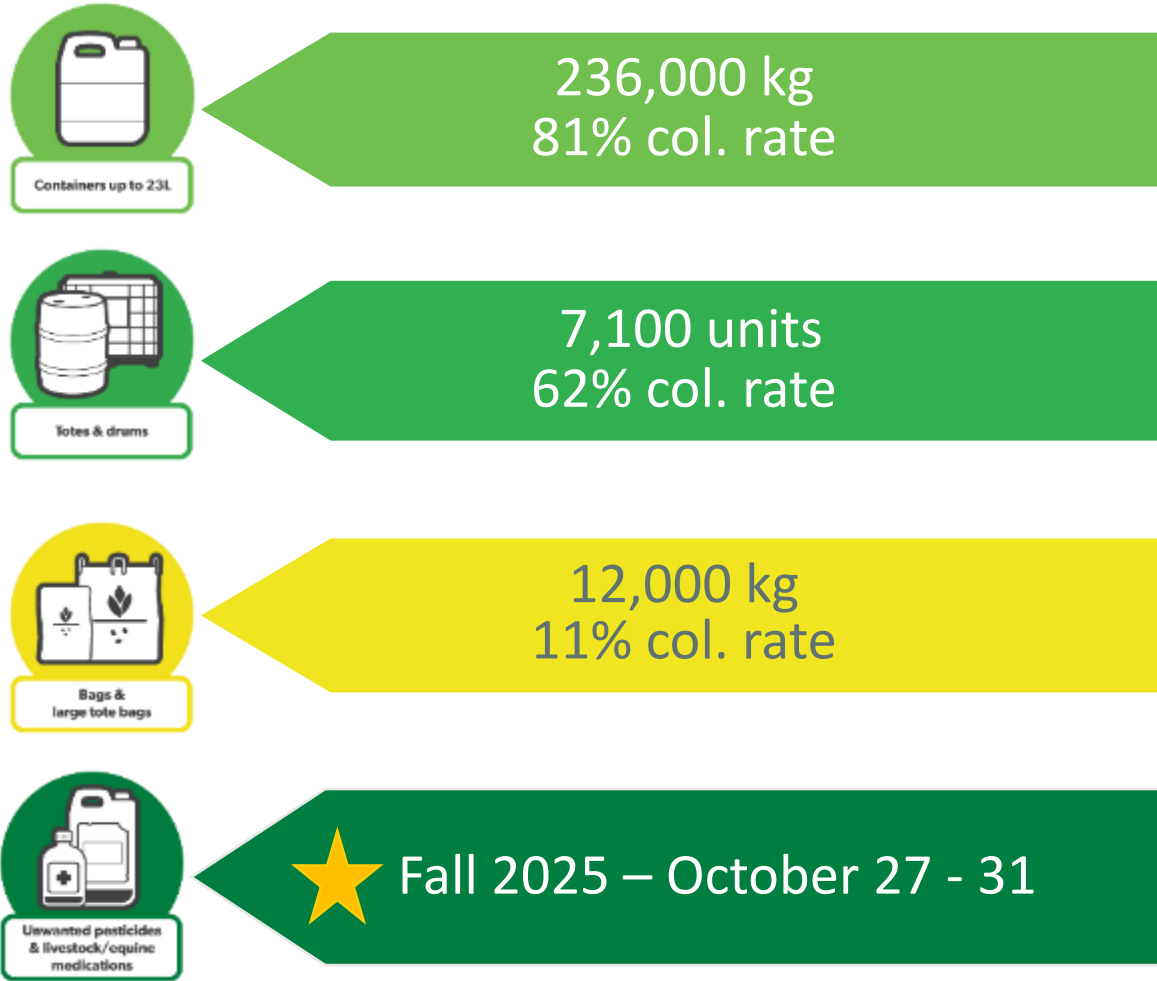

- On-farm separation

Specialized collection sites

Contractors: ~20 across Canada, local for each province

Recyclers: ~10 across N.A.

Permanent, industry funded

Permanent, industry funded

236,000 kg
81% col. rate

1989 – 2021

- *Municipal collection sites*

2021 – 2024

- *Hybrid model*
- *Lots of change*

2025 onwards

- *Mainly ag retail collection sites*
- *Some municipal collection sites*

Permanent, industry funded

31,000 kg
42 collection sites

13,000 kg
42 collection sites

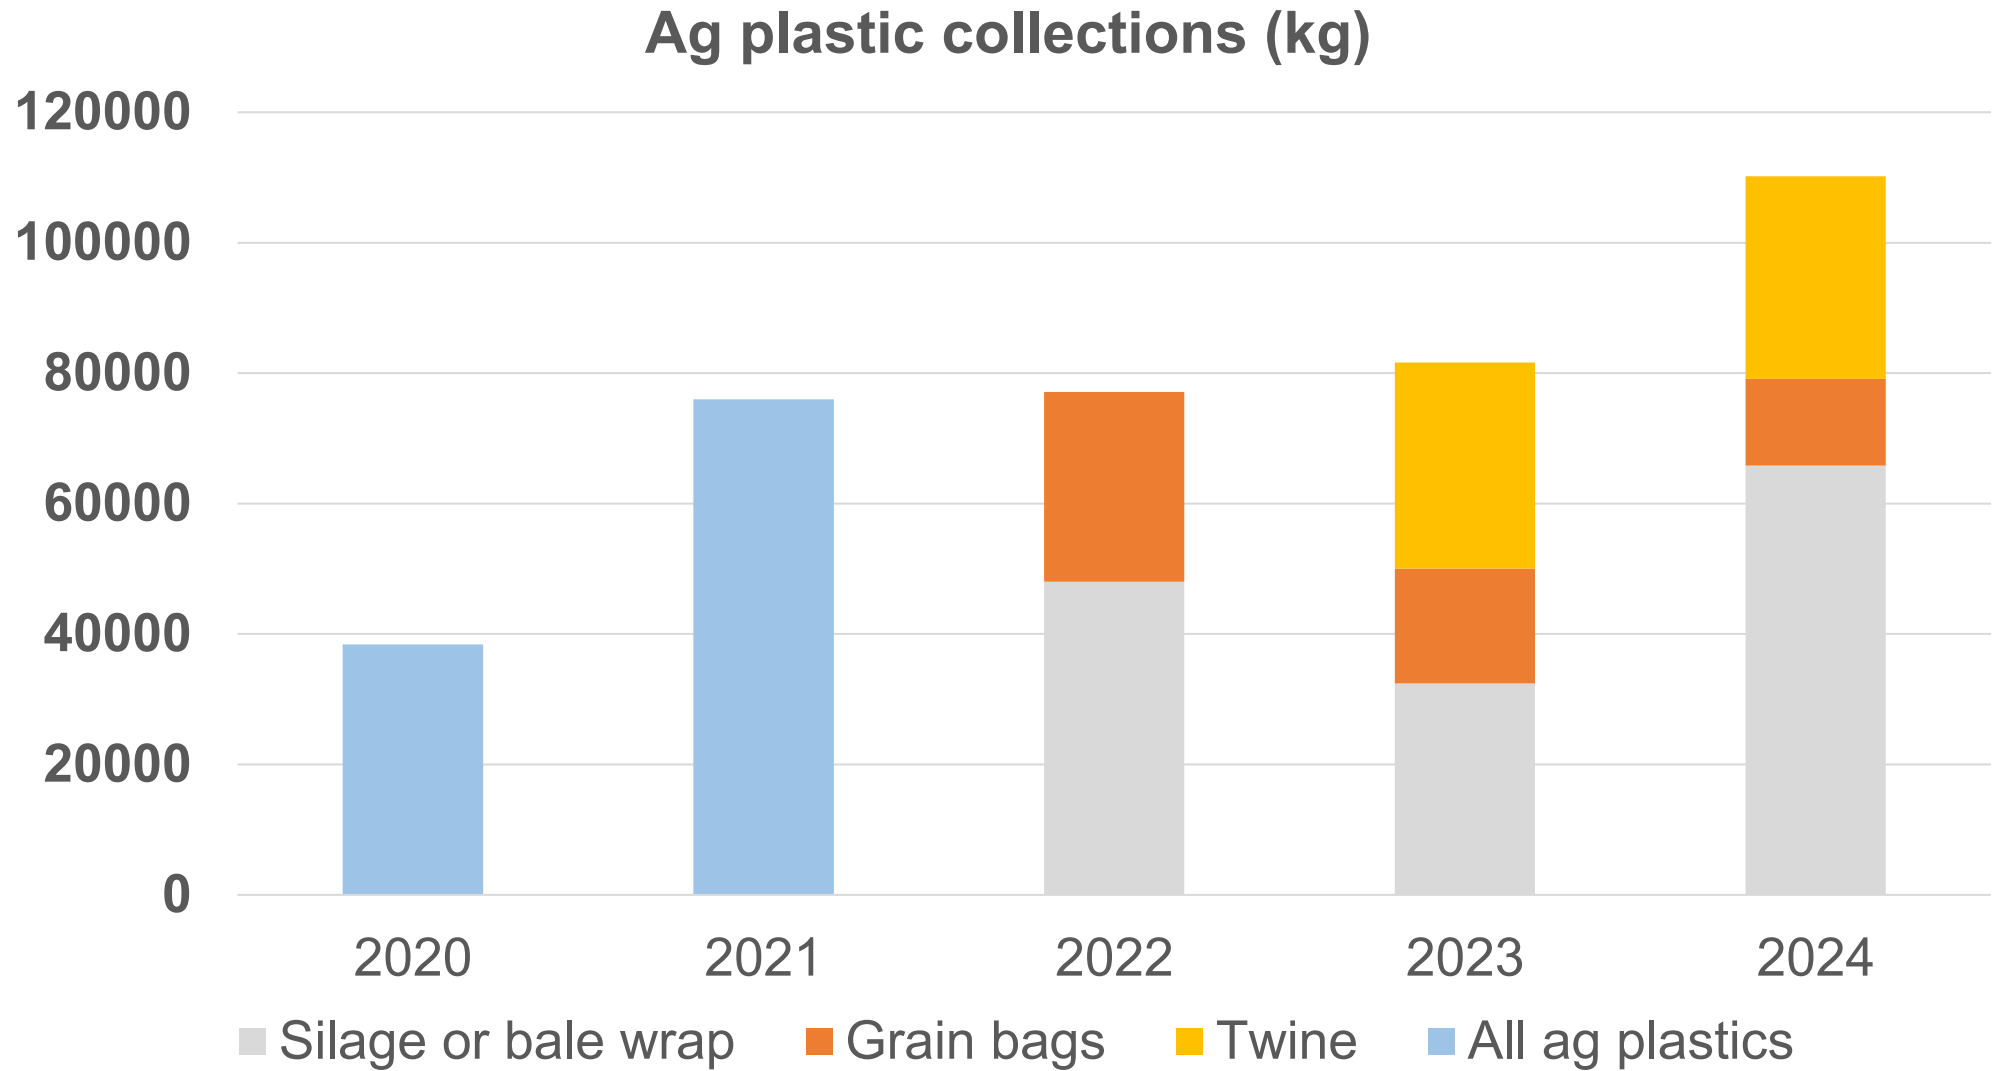

Non-permanent programs (2021 – 2025)

65,000 kg
40 collection sites

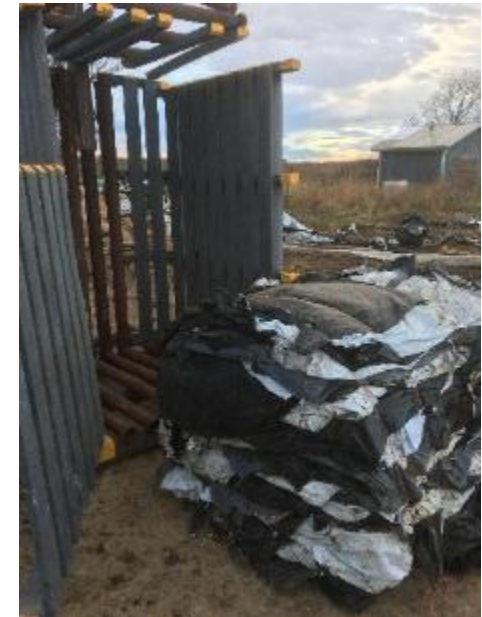

Should silage/bale wrap collections be made available year-over-year?

- Potential for greater efficiencies & better service
 - Develop long term relationships with contractors
- Year-over year reliability for farmers
- Better compensation for municipalities
 - Permanent program = Collection site compensation

- Small volumes
 - Economies of scale with neighbouring provinces
- Industry funded = Environmental Handling Fees
 - Increased cost to farmer
- Farmer awareness & participation
 - Community by community approach
 - On-farm visits

- Are the timelines for designating new ag plastics reasonable?
- How can Cleanfarms increase farmer awareness and usage of recycling programs?
- How can Cleanfarms customize programming to accommodate farmers in your community?
- What other types of agricultural plastics should be considered for inclusion as designated materials for the next renewal period (2031 onwards)?
